C Programming

The Ultimate guide for beginners

Keywords in C

In C, we have 32 keywords which have their pre-defined meaning and cannot be used as a variable name. Keywords are case-sensitive meaning "auto" is a keyword and "**A**uto" (with capital A) is not.

auto	break	case	char
const	continue	default	do
double	else	enum	extern
float	for	goto	if
int	long	register	return
short	signed	sizeof	static
struct	switch	typedef	union
unsigned	void	volatile	while
